

Klarity™ Freestanding Glass Partition

Define Spaces Using Maximum Transparency

The Klarity Freestanding Glass Partition seamlessly defines interior spaces using expansive glass spans that maximize transparency and daylight diffusion. A key benefit of the Klarity system is its ultra-slim posts with a 3/4" face trim. This creates virtually unobstructed views that articulate a spacious and modern environment.

The highly versatile Klarity Partition System offers unlimited configurations using any combination of end posts, center posts, and corner posts in standard and custom sizes. Although slim, Klarity posts and glass clamps feature robust 316 grade stainless steel construction that ensures structural integrity and lasting durability.

Klarity™ Features & Benefits

The Klarity Freestanding Glass Partition is available in 5-foot, 6-foot, and 7-foot post heights. The system is ideal for commercial interiors with high or exposed ceilings. Other applications include transportation hubs, education, sports stadiums, healthcare, and government buildings.
